How to Use This Index

In order to make *Curriculum Review* a useful selection tool on a continuing basis, we provide this annual cross-referenced index of the more than 800 evaluations and articles contained in Volume 18. It offers a synthesis of the most recent educational materials and a foundation for sound curriculum planning.

The coordination between the Subject Index and Consecutive Listing makes it possible for readers to focus on individual selection needs and locate pertinent reviews quickly and easily. The Subject Index contains all reviews in Volume 18 listed by topic. When the appropriate topic has been located, the reader should use its page numbers to refer to the Consecutive Listing, which is composed of the tables of contents from each issue of *CR* in sequential page order. There the reader will find the exact title and grade range and decide whether or not to look up the evaluation itself in the issues.

New this year is the comprehensive Title Index, an alphabetized listing of all titles reviewed this year, including the name of the author or developer. For specialized needs, there are additional listings: Basal Programs, Features, and Articles. In addition, there is a Publisher Index of all companies whose materials have been reviewed in 1979, along with complete address information and page references.
